#### **Hazardous Weather**

#### **Hazardous Weather**

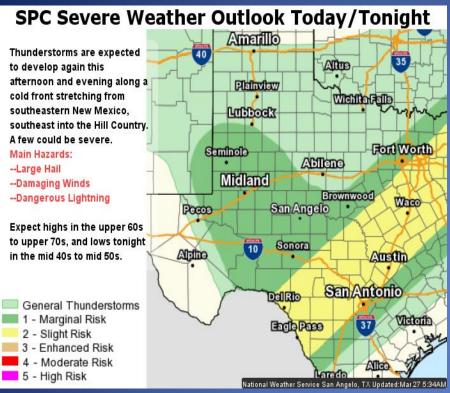

Cloudy skies will prevail today. Rain chances will steadily increase from west to east as showers and thunderstorms develop and spread eastward across the region. Locally heavy rain may result in flash flooding. In addition, some of the storms may become severe with damaging wind and large hail. A cold front will move through the region today, switching the winds to the north. Temperatures won't make it out of the 60s today in our northwest areas, but some locations ahead of the front may reach 80 degrees this afternoon.

Thunderstorms will be possible tonight, mainly over the Southeast New Mexico Plains, Permian Basin, and Western Low Rolling Plains. Some storms could be strong to severe with damaging winds, hail and locally heavy rainfall.

#### **Hazardous Weather**

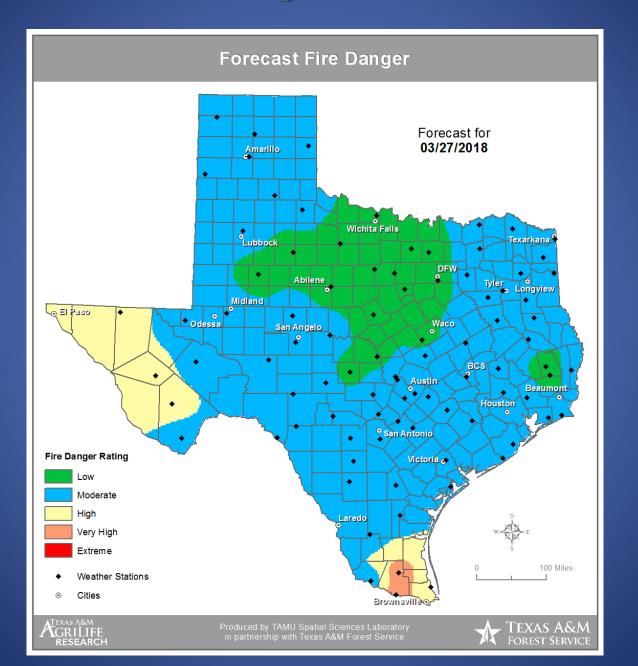

Another round of severe thunderstorms possible Tuesday afternoon and evening. The main hazards will be large hail and damaging winds along with deadly lightning.
